DETAILED ACTION

Claims 44-63 are presented for examination.

Applicant's response to the restriction requirement filed on July 30, 2008 is acknowledged. Accordingly, Applicants elect Group I claims 44-50 drawn to a method of providing a food product thereof for examination with traverse.

Applicant argues that Goddijin does not teach the instant claims. Applicant is reminded that Goddijin teaches the components of the instant claims. Therefore the invention is not novel. Therefore election/restriction is deemed proper and is final. Claims 51-63 are withdrawn from consideration as being directed to non-elected subject matter. Claims 44-63 read on the elected invention and are herein examined on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Miljkovic et al. (US Pub. No. 2005/0042327 A1).

Miljkovic et al. discloses a composition and the preferred components: comprises a synthetic cytokinin having a purine heterocyclic base or a pyrimidine heterocyclic base.

The synthetic cytokinin are dihydrozeatin, kinetin, and trans-zeatin.

Preferred Composition: The cytokinin is present in the fermentation medium at a concentration of at least 1 microM), comprises a plant extract. The cytokinin is present to activate an adenosine monophosphate (AMP)-activated protein kinase of the microorganism and to increase the uptake of a carbohydrate into the microorganism. The liquid is a beverage for human consumption. Consequently, the reference anticipates the claimed invention defined in claims 44-50.

No claim is allowed.
